

Blue Sky Lighting manufactures the highest quality products in the market and takes a rigorous approach to ensuring our products produce reliable lighting throughout its designed lifetime. In the rare instance of a product failure the guidelines below will outline the Blue Sky Lighting warranty policy.

Subject to the conditions set out below Blue Sky Lighting, LLC (“Blue Sky”) warrants that Blue Sky components and power supplies will correspond with their specification at the time of delivery and will be free from defects in materials and workmanship for the time period outlined below from the date of their initial use or from the date of delivery, whichever is the first to expire.

Blue Sky shall be under no liability in respect of any defect arising from fair wear and tear, willful damage, negligence, abnormal working conditions, failure to follow Blue Sky's instructions (whether oral or in writing), misuse or alteration or repair of Blue Sky components or power supplies without Blue Sky's approval;

Blue Sky shall be under no liability under the above warranty (or any other warranty, condition or guarantee) if the total price for the product(s) has not been paid by the due date for payment;

this warranty only applies when the components and power supplies are properly wired together as a system in accordance with the installation guidelines and parameters as well as any local or national standards including, but not limited to, those of the Underwriters Laboratory (UL) and the National Electrical Code; **use of any component or power supply of another manufacturer within the system will void the entire warranty.**

LEDs over their designed lifetime incur some degradation of light performance. Blue Sky Lighting designs its products to minimize this degradation, but this depreciation is considered within normal operating parameters and is not covered within the scope of the warranty.

Notification

To make a warranty claim, a request must be sent to warranty@BlueSkyLighting.com. If applicable, Blue Sky will issue a warranty claim number (WCN) and information on where to ship the product. The purchaser must ship and postmark the unit within 10 days of receiving the WCN having clearly marked the package with the WCN. Failing to do so will void the warranty. A warranty claim must be made within 7 days of the purchaser becoming aware of the defect.

Blue Sky reserves the right to inspect any defective Blue Sky component or power supply to determine the source of the product fault and to be the sole judge as to whether the component is in fact materially defective, has been used within parameters and is covered under this warranty.

Where any valid claim in respect of any Blue Sky component and power supply which is based on any defect in the quality or condition of Blue Sky components and power supplies or their failure to meet specification is notified to Blue Sky in accordance with these conditions, Blue Sky shall be entitled to replace Blue Sky components and power supplies (or the part in question) free of charge exclusive of inbound shipping costs or, at Blue Sky's sole discretion, refund to the purchaser the price of Blue Sky components and power supplies (or a proportionate part of the price), but Blue Sky shall have no further liability to the purchaser.

Blue Sky Lighting shall not be liable to the purchaser by reason of any representation, or any implied warranty, condition or other term, for any consequential loss or damage (whether for loss or profit or otherwise), costs including field support labor, expenses or other claims for consequential compensation whatsoever (whether caused by the negligence of Blue Sky, its employees or agents or otherwise) which arise out of or in connection with the supply of Blue Sky components and power supplies or their use or resale by the purchaser, except as expressly provided in these conditions.

Blue Sky shall not be liable to the purchaser or be deemed to be in breach of the contract by reason of any delay in performing, or any failure to perform, any of Blue Sky's obligations in relation to the components, if the delay or failure was due to any cause beyond Blue Sky's reasonable control.
